*Curating Local
Knowledge*

Motivation

Our Approach

Data and Design

Results

Discussion

Conclusion

Background

- Micro & Small firms (MSEs) main **source of employment** in the developing world
- In **Indonesia**, MSEs represent 99% of all firms and 94.5% of employment
- Understanding the factors fostering efficiency and growth of MSEs is an important research and policy goal

A Growing Focus on Management

- **Classroom Training:** Field, et al. (2010); Karlan & Valdivia (2011); Bruhn & Zia (2013); McKenzie & Woodruff (2014, 2017); Bulte et al. (2017); Anderson, Chandy & Zia (2018); Lafortune et al. (2018)
- **Consulting:** Bloom, et al. (2013); Karlan et al (2015); Bruhn, Karlan & Schoar (2019)
- **Mobilizing Peer Knowledge:**
 - Brooks et al. (2018) → Local mentors (market information)
 - Cai & Szeidl (2018) → Business meetings
 - Abebe et al. (2019) → Management experience matching

Conclusion

Harnessing Cross-Firm Heterogeneity

- Some facts about business practices in firms:
 - Vast heterogeneity in business practices and performance across similar businesses (de Mel, McKenzie & Woodruff, 2009)
 - Variation in practices accounts for more than 20% of variation in productivity within the same firm in the US (Bloom et al, 2019)

Discussion

Conclusion

Harnessing Cross-Firm Heterogeneity

- Some facts about business practices in firms:
 - Vast heterogeneity in business practices and performance across similar businesses (de Mel, McKenzie & Woodruff, 2009)
 - Variation in practices accounts for more than 20% of variation in productivity within the same firm in the US (Bloom et al, 2019)
- Research thus far has mostly overlooked this underlying heterogeneity in design and implementation of programs
- Our idea is to make it **central** to the research design:
 - Use variation across businesses to identify business practices associated with successful performance
 - Instead of teaching set courses, provide consulting, or matching; we curate what works from local peers
 - Test different communication channels and their cost-effectiveness

PART I: Lecture
Business Practices

PART II: Paper
*Curating Local
Knowledge*

Motivation

Our Approach

Data and Design

Results

Discussion

Conclusion

Selecting Local Best Practices

- Detailed **qualitative interviews** with local business peers:
 - Understand and codify their practices (record-keeping, financial planning, stocking-up, marketing, and joint decision-making)
 - Identify implementation norms and beliefs regarding each practice (e.g. whether they are complicated, necessary, etc.)
 - Document locally relevant tips and rule of thumbs
- Baseline **quantitative survey**
 - Measure practices and outcomes
 - Quantitative association of business practices with profits and sales

Results

Discussion

Conclusion

Disseminating Knowledge

■ Handbook

- **Pure information:** Which practices, how to adopt, and why?

Supplemented with two types of experiential learning:

■ Movie

- **Psychological and emotional involvement** → social learning is possible through **observing the successful experience of similar others**.
- Bernard, et al. (2014); La Ferrara et al. (2012); Chong and La Ferrara (2009); Berg and Zia (2013).

■ In-shop Assistance

- **Hands-on involvement** → social learning is possible through own **experience, with a small nudge** (Kolb, 1984).
- Facilitated by local lay person

Conclusion

Research Questions

■ Adoption

- Do retailers adopt these practices once peer best practices are aggregated and made common knowledge?
- If so, ...
 - Does the type of experiential involvement matter?

■ Impact

- Does firm profitability increase?
- If so, what are the channels?

Conclusion

Sample

- Listing of 2042 small retail businesses from 29 administrative communities (Kelurahan) in urban Jakarta
- Selection criteria for firm listing:
 - At least $4m^2$ in size
 - At least two different product categories on offer
 - At least 30 meters distance to next business in sample → to minimize spillovers
- Random sample of 1301 from the list
- Randomization to treatment arms stratified by
 - Gender
 - Firm space ($4-6m^2$, $6-10m^2$, 10 and above m^2)
 - Composite score of business practices above or below median
 - Kelurahan

Handbook Content

Why you should try these best practices in your shop

Evidence from a large-scale study on Jakarta-based retailers

RECORD-KEEPING

Shop owners who keep business records report 28% higher monthly sales and 26% higher monthly profits than those who do not keep business records.

Shop owners who track their customers' debts report 40% higher monthly sales and 36% higher monthly profits than those who do not track their customers' debts.

STOCK-UP SCHEDULING

Shops that maintain stock-up schedules earn 26% more in monthly sales and 25% more in profits than those that do not maintain stock-up schedules of their primary products.

Shops that stock up daily rather than weekly earn 48% more in monthly sales and 37% more in monthly profits.

Handbook Content II

A step-by-step guide to record-keeping

Step 1: Separating household and business finances

The best way to start keeping records is by establishing a clear separation between your personal and business finances. We do not mean this in the strictest sense of keeping your business cash away from your personal life completely; rather we advise you to not lose sight of your cash flow.

The most convenient and effective way to separate your personal and business finances is by **physically separating the funds into two different cash boxes, purses, or drawers. Label them clearly; use one compartment for business purposes and another for personal.**

Use only your business compartment to follow this handbook from this point forward. Make sure that money in your business compartment is used only for business purposes. Be meticulous about it - this is the first step to get your finances organized!

There is an activity at the end of this section that requires an additional compartment. If you have one more cash box, purse, or drawer available, please reserve it for this activity ([record-keeping, extra step](#)).

Conclusion

■ Sales increase by 16% (about 0.15 sd.) - ITT

Other Outcomes

- **No significant** impacts on:
 - Business expenses
 - Size of the shop
 - Number of employees
 - Number of customers
 - Business credit

Conclusion

Efficiency Gains?

1 Unpacking impacts on practices shows improvements in efficiency practices:

- Adjust stocks based on product profitability
- Negotiate lower prices with suppliers
- Consult with former customers
- Offer discounts
- Make joint decisions
- Review financial performance to identify channels of improvement
- Make anticipated budget for upcoming costs

Conclusion

Business Stealing?

Do treated businesses improve performance at the expense of the control group?

- Shops in Control group **do not decrease** their sales and profits from baseline to endline. They remain the same.
- Shops in Control group that are closer to the treated shops **do not suffer bigger losses in sales and profits** than those who are further away.

→ No evidence for business stealing

Cost-Effectiveness

■ Low cost per firm:

- Cost Handbook alone: USD 100
- Cost Handbook & Movie: USD 125
- Cost Handbook & Assistance: USD 125
- Cost Handbook & Assistance & Movie: USD 150

■ High Benefits

- Up to USD 330 per month in profits.
- Adoption of top practices by retailers.

■ Research Design likely **scalable and replicable** in other settings.

Takeaways

- Curating local knowledge has value for business growth
- Information alone does not have impact, but behavioral interventions are needed
- These “add-ons” are inexpensive and scalable, making this type of intervention very attractive for policy
